VeriFone
THE WAY TO PAY™

VeriFone – the worlds leading supplier with over 12 million terminals installed.

Omni 3750

WITH SC5000 PINPAD

FEATURES AND BENEFITS

Exceptional Performance

- 32-bit processor and 3 Mbytes of dynamically managed memory provide exceptional processing on debit, credit, and value-added transactions – including EMV smart card.
- High speed 14.4 kbps modem and VeriCentre file compression support faster application downloads.
- Fast transactions – a few key presses on both merchant terminal and customer PINPad are all that is required for transactions.

Easy To Use

- Intuitive ATM-style interface, large backlit display, ergonomic keys, and bold menu prompts to minimise training time, reduce errors, and speed up transaction time.
- Integrated high speed thermal printer with drop in clam shell loading to simplify paper changing and virtually eliminate jams.
- Triple-track card reader handles magnetic striped cards.
- Built in smart card reader supports growing move to chip based smart cards.
- Sleek and stylish with an extremely small footprint.
- Customer PINPad – easy to read display and large keys are perfect for customer account selection and PIN entry.
- Backlighting on terminal improves readability in low light environments.

Advanced Security And Superior Reliability

- Latest security protections include advanced 3DES encryption.
- The Omni 3750 is Visa PED Approved for debit and other PIN-based transactions, and has EMV Level 1 and Level 2 Type Approval.
- Redundant PINPad in the Omni 3750 terminal means the terminal can run as a standalone device in the event of SC5000 failure.
- VeriFone's unsurpassed quality and reliability provide further assurance of problem-free usage.

Dimensions

- Omni 3750: 210mm x 104mm x 83mm Weight: 990grams
- SC5000: 155mm x 95mm x 51mm Weight: 340grams
