THE WAY TO PAY™

VeriFone – the worlds leading supplier with over 12 million terminals installed.

# Omni 3750

## 3 IN 1

### FEATURES AND BENEFITS

#### *Exceptional Performance*

- 32-bit processor and 3 Mbytes of dynamically managed memory provide exceptional processing on debit, credit, and value-added transactions – including EMV smart card.
- High speed 14.4 kbps modem and VeriCentre file compression support faster application downloads.
- Fast transactions – a few key presses by both merchant and customer are all that is required for transactions.

#### *Easy To Use*

- Intuitive ATM-style interface, large backlit display, ergonomic keys, and bold menu prompts to minimise training time, reduce errors, and speed up transaction time.
- Integrated high speed thermal printer with drop in clam shell loading to simplify paper changing and virtually eliminate jams.
- Triple-track card reader handles magnetic striped cards.
- Built in smart card reader supports growing move to chip based smart cards.
- Sleek and stylish with an extremely small footprint.
- Backlighting on terminal improves readability in low light environments.

#### *Advanced Security And Superior Reliability*

- Latest security protections include advanced 3DES encryption.
- The Omni 3750 is Visa PED Approved for debit and other PIN-based transactions, and has EMV Level 1 and Level 2 Type Approval.
- VeriFone's unsurpassed quality and reliability provide further assurance of problem-free usage.

#### *Dimensions*

- 210mm x 104mm x 83mm    Weight: 990grams
